OUR DESIGNERS

The Burgess in-house design team, led by Peter Roth, has a combined experience of over 60 years designing the best hospitality furniture for the most prestigious venues around the world.

Working very closely with our customers, the focus is always on designing not only great looking products, but ensuring the latest innovations and trends are incorporated into every product we make.

Evolving Designs

Our designs are “never final”. They evolve and because we have our own factory, we are able to work with clients to customise many of our products to meet their specific design needs, giving them a truly unique experience.

The design is crucial as the product needs to be multifunctional, practical and tough enough to meet the demands of the busiest hotels and conference centres around the world; every Burgess product is made to the highest standards in our UK factory.

Before we launch any new design, it has to undergo rigorous independent testing, to ensure it performs as well as it looks.

Every member of the Burgess team works hard to ensure the end product and customer service matches the highest demands and expectations of the hospitality industry.

Peter Roth and Team

WHY CHOOSE BURGESS?

STRENGTH

Did you know our furniture has been known to last over 40 years? Strength and durability are at the core of every piece we make, from the specific alloys we choose to the robust design. Our furniture is independently tested in a simulated environment to ensure it meets hospitality demands.

- Unique aluminium alloy blend
- Precise heat treatment
- On site manufacturing and tooling
- Independently tested

PEACE OF MIND

When you partner with Burgess, you can be confident in your furniture choice. We ensure your new furniture not only has visual impact but continuously works in your space, supported by our long-term after sales service.

- Consultative sales process
- Samples / Renders / Operational room layouts
- Comprehensive after-sales support

QUALITY

Your new furniture has been made to the highest quality standards and controls at every stage, from the raw materials to final assembly. Our factory combines state of the art manufacturing and manual craftsmanship to guarantee an exceptional level of detail and finish. That is why you will find our furniture in some of the world's most prestigious venues.

- Industry leading manufacturing processes
- Strict quality standards and controls throughout production
- Source and select only the highest quality materials

CUSTOMISATION

Unique spaces need unique solutions. As manufacturers we can tailor our furniture to fit your exact requirements. Our designers will work with you, so your new modified piece defines your space, creates an impact and makes the statement that fits with your brand.

- Customise our designs to suit your space
- Minimum quantities apply
- Charges may apply above standard pricing

Conference – Furniture needs to offer comfort and allow for conference venues to fit a high number of people comfortably into a given space. Burgess Furniture allows for this and our teams provide our customers with seating layouts carefully designed to keep the latter in mind.

Events & Dining – Dining furniture needs to offer comfort and elegance whilst also maximising occupancy. Burgess keeps all this in mind when designing new events and dining products.

Meeting – Meeting furniture offers comfort and style. Burgess meeting furniture offers you just that!

Bedroom – Bedroom furniture needs to either fit under a desk and be functional and stylish whilst also bringing a home from home feel, or be a feature in the room and really boast comfort and great style.

Casual seating – Casual seating furniture offers fun, comfort, and out of the box design whilst also answering the growing need for technology. Burgess Furniture casual seating range offers our end users just that!

CHAIR ACCESSORIES

Looking for those extra touches?
Personalise your chairs to suit the needs of your space with these additional features. Easily move chairs with handles, keep them inline during events with linking and give guests space to take those all-important notes at your conference with writing tablets.
These accessories allow your chairs to function in different ways, depending on your desired set up, without the need for entirely new products. Use the checklist below to see which additions can be added to your desired model. Pick yours now!

RECESSED HANDLE

A recessed handle fits discreetly in the back of the chair, sitting flush against the backrest. The handle frame adds a stylish detail that can be coloured to match the chair frame, whilst the handle makes moving or lifting chairs easier.

BACK HANDLE

The back handle is a rectangular bar handle attached to the back of the chair, to aid in moving or lifting chairs. Finished in brushed silver, it adds elegant detailing to the back of the chair.

FRONT LEG MOUNTED TABLET

This detachable writing tablet is mounted on a steel stem to the front leg of chairs. The kidney shaped top flips upright for access, and can be finished in a variety of High-Pressure Laminates with T-barb edging. The stem can be powder coated with any solid finish. Chairs can still be stacked when tablet is attached, in its flipped up position.

ROTARY TABLET

This teardrop shaped, detachable witting tablet is mounted on a steel stem to either the front leg or under the seat depending on the chosen chair model. The top rotates 180 degrees at a 45 degree angle from vertical at the side of the chair, into a horizontal position for use. The stem can be powder coated in any solid finish and the wooden top is covered in moulded rubber for a soft touch.

RETRACTABLE LINKING

The most popular choice, this linking consists of a discreet wire frame that slides out from underneath the chair seat. Once extended, two adjacent links hook together, holding chairs in place. This type of linking comes in various lengths depending on the chair model chosen and is finished in silver.

PLASTIC LINKING

Available in 3 colours; black, gold and silver, plastic links are fixed to the chair frame at seat level, and can be joined together with a dove tail joint.

SPACER LINK

The spacer link is an additional connector that sits between plastic linking, to extend the distance between two connected chairs. The spacer link is an extruded piece of aluminium, which can be powder coated to match the chair frame. This spacer can be used on chairs with or without arms.

SIDE TO SIDE LINKING (SUFFIX LINKSS)

Specifically for the Evosa 08/1 and 08/2 models, this black plastic clip presses onto the frame of each chair leg, holding the chairs together. This same clip can be used to connect armchairs (08/1A and 08/2A) to side chairs (08/1 and 08/2) with the use of an additional clip and bobbin, connecting the chairs at the leg. For this, add suffix LINKSA.

ARM TO ARM LINKING (SUFFIX LINKAA)

Specifically for the Evosa 08/1A and 08/2A models, arm to arm linking is achieved with this plastic clip. Plastic bobbins are permanently fixed to the underside of the arm pads, to which the clip attaches, holding the chairs together.

SPACER TABLET

The spacer tablet sits in between plastic linking, to add a rectangular tablet between two chairs. The tablet is available in our wide range of HPL finishes with T-barb edging.

ORVIA LINKING

The linking system for the Orvia chair is made up of retractable metal plates that hook together, keeping chairs in place at seat level. The plates slide back underneath the chair base when not in use for a discreet design.

ADATTA WRITING TABLET

The Adatta detachable rotary writing tablet fits into the casting and is held in place with a single hand-wheel. The stem can be powered coated in any solid finish and the teardrop shaped top is finished in a moulded rubber for a soft touch.

NUMERICAL CLIP

Numbers and/or letters can be added to retractable linking, to highlight columns and rows, with this small plastic attachment. This piece easily clips onto the wire frame of the retractable linking when in place, and is black, with a white label and black writing.

ADATTA LINKING

Extending from the casting, the cylindrical retractable link joins the adjacent chair together holding the chairs in place. When not in use, the link slides back into the casting. The silver colour link is for use only on Adatta and has the option to add numbering clips.

EVOSA HIGH STOOL

An exciting addition to the Evosa range, the Evosa High Stool adds height and sophistication to your space. Available with a high or low back, its minimalistic design is finished in striking chrome as standard, but the option of any solid paint colour or trend-led industrial finish gives you flexibility to match your aesthetic.

The Evosa High Stool's upholstered, stitch-ribbed seat gives a modern look, whilst the slim steel frame retains integral strength, giving you peace of mind that it will stand the test of time.

Pair with our Trans-Pose® table for a stylish break out space, or mix and match with the Evosa range and low tables to add visual interest and multiple zones in casual work areas.

Features
- Seat stacking up to 6 high

JUNEA SOFA

An extension – quite literally – of our coveted Junea range, the Junea Sofa brings double the style for your guests.

Designed by Peter Roth, this elegant 2-seater pairs seamlessly with any of our Junea single seats. Create comfortable lobby areas or make a statement with a standalone piece in a bedroom or breakout area.

Available in both high and low back, the Junea Sofa gives you the option to design a space your guests will love.

Stunning timber legs, a striking underframe and a wide range of Burgess fabrics allow Junea Sofa to be customised to suit your aesthetic.

Features
- High back or Low back
- Extremely comfortable
- Compact design
- Timber legs
- Base frame powder coated

Options
- Base frame available in wide choice of solid finishes
- Timber legs available in Natural, Walnut stained or Charcoal stained hardwood
- Choice of nylon or felt glides
- A wide choice of upholstery from the Burgess fabrics range

Conference – Furniture needs to offer comfort and allow for conference venues to fit a high number of people comfortably in a given space. Burgess furniture allows for this and our conference tables are easily foldable or have a flip top for easy storage keeping our end users in mind.

Events & Dining – Dining furniture needs to offer comfort and elegance whilst also maximise occupancy. Burgess keeps all this in mind when designing new events and dining products.

Meeting – Meeting furniture offers comfort and style. Burgess meeting furniture offers you just that! With boardroom tables to make a statement or easily stored meeting tables.

A-CROSS

Stumble A-Cross a table that provides style and versatility to round off any space.

Add an elegant and convenient coffee table to elevate any space with the new A-Cross range. An extension of the A-Fold range, this stylish table comes with timber legs in a choice of 3 different colours, bringing a natural element to compliment any of the full HPL range top finishes on offer. This beautiful smaller piece can fit in a huge variety of spaces thanks to 2 height options, adding a touch of charm to your room whilst maximising practicality.

Features
- Timber legs
- 2 heights: 40cm & 50cm
- 2 top shapes: round & square

A-FOLD®

Be bold. Go A-Fold®.

Why pick elegance over practicality when you can have both in one ultra-stylish folding table?

Designed by Peter Roth, the A-Fold® is the latest model by Burgess Furniture. A multifunctional range of tables which offers flexibility and ease of use.

Available in rectangular, round, D-ends and triangular corner sections, the A-fold® collection blends great design with structural rigidity and ingenious practical details. Very economic, it will save the end user laundry costs as the table does not require clothing. The underframe is available in a choice of powder coated finishes and an optional part timber leg adds a natural element to tie in with surrounding features and brings a home from home warm feeling to your spaces.

Features

- Folding legs with integral latch to keep the legs shut for easy storage
- Locking slide to ensure folding mechanism is secure during use
- Discreet linking clips as standard
- 18mm table tops are available in high pressure laminate with a durable T-Barb edge in a choice of colours
- Powder coated underframe and chrome locking mechanism
- White underframe comes fitted with white moulded feet (all other frame colours are fitted with black feet)

Options

- Wide variety of shapes and sizes available: rectangular, round, D-ends, triangular corners and bridge tops
- Timber leg in Walnut, Natural or Charcoal hardwood
- Powder coated aluminium modesty panel with magnetic click fit
- Available in a wide range of frame finishes including industrial finish

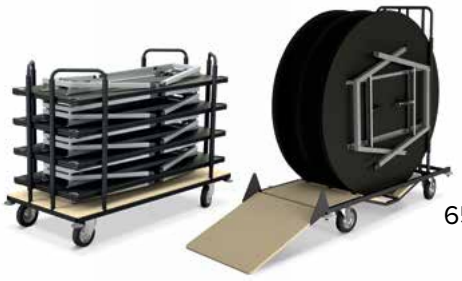
A-FOLD TROLLEY AVAILABLE

The Rectangular table trolley accommodates up to 8 tables and the round table trolley accommodates 6 tables for a practical solution to storage. For more information see page 84



CONFIGURE-8

The Configure-8 table range offers a stunningly superior look. Designed using anodised aluminium this sleek, slim and lightweight table will look great in any meeting, conference or boardroom.

Each table is fitted with discreet linking clips, so you can join several tables together to create exactly the right layout you need. It also has adjustable feet to level the tables.

Features
- Corner post with integral stacking and linking for desired layout
- Folding legs to allow for practical storage
- The tops are available in a range of high quality laminate finishes with an elliptical bull-nosed hardwood edge
- Adjustable feet enable you to get just the right level in any room situation
- Anodised aluminium frame
- Leg infill panel matching table top finish
- For information on trolleys see page 84

Options
- Aluminium or matching laminate modesty panels are available
- Powder coated

CONFIGURE-8 FLIP-TOP

The Configure-8 Flip-Top answers all the needs of the most demanding conference and meeting room venues. The Configure-8 Flip-Top table offers a superior nesting table system for meetings and conferences. Tables can be stored in echelon with the top in the vertical position. The anodised aluminium leg frames are set out to the ends of the table to enable the user to sit within the table comfortably.

Features
- Flip-Top mechanism with a quick release latch
- High pressure laminate or real wood laminate
- Leg infill panel to match table top
- Castors fitted as standard, 2 braked
- Permanent modesty panel

Options
- Power module includes table trunking, cable tray and front fascia panel
- Power modules have the facility for daisy chaining to reduce extension cables, up to 6 sockets max
- Power module available to suit different country requirements
- Powder coat option

FLIP-TOP

The Flip-Top range offers the ultimate in tabling for a quality meeting & conference environment. With the choice of top shapes Flip-Top provides the versatility to create a variety of layouts. The underframes are polished stainless steel as standard, and the flip action of the top allows the tables to be nested to minimise storage requirements.

Features
- A choice of laminate tops including high pressure laminate and wood laminate, both with solid hardwood leading edges
- Castors fitted as standard (2 braked)
- 25mm hardwood leading edge as standard
- Quadrant corners can be used to create U-shape layouts

Options
- Adjustable glides (table height reduces to 72cm)
- Permanent or detachable laminate modesty panels

MEET-U®

DESIGN GUILD MARK

The Meet-U® meeting table system includes innovative features to allow for agile working and modern technology. Designed with the user in mind, tables can be linked together to form the perfect layout for any meeting room environment. Available with a rectangle, square or round table top.

Features
- A multi-function clip can be used to secure and support a modesty panel, link tables together and support power cables as a 'cable tidy' (unavailable with the round table top)
- Adjustable feet up to 25mm

Options
- Modesty panels are available for the front and side of the table
- Castors (2 per table) can be fitted allowing for easy movement
- Anodised or powder coated leg
- Cable Port – 80mm diameter port can be fitted centred to long edge
- Power module available to suit different countries' requirements
- For information on the Axial Comfort power module see page 91
- For frames and finishes please see page 106

Chairs featured Sentrum 05/1A

SLIMFOLD™

The latest generation of banquet tables, the Slimfold™ range features a strengthened and easy to handle locking mechanism. The robust leg frame is finished in a pewter hammer powder coat and our washable, grey flock coated table top reduces noise and cloth slippage, making it an ideal choice for banquets and dining events.

Slimfold™ table tops are aluminium edged for maximum protection and are available in multiple shapes including round, rectangular and half round, so you can choose the shape to suit your space.

Features
- Table tops are aluminium edged for maximum protection, unless HPL is chosen
- Tops also available in High Pressure Laminate, with T-Barb edging
- All Slimfold™ tables are based on the folding mechanism which has made the product world-renowned
- The tubular locking channel and locking tab are designed for improved strength

Options/Accessories
- 3 heights: 72cm, 74cm and 76cm
- Create mobile buffet unit with additional mini clamp-on table, wheel adapters and drop-on shelf
- Wheel adapter
- Height adapter
- Tailored sizes & T-bar leg configurations available on request

SYSTEM-C

A superior folding table system to fulfill conference managers' requirements. System-C is equally at home in contemporary and traditional syndicate meeting rooms. Our CAD layout service is available to all Burgess customers to assist with product selection and specification.

A selection of table top finishes are available and the frames can be finished in a choice of chrome plated mild steel, or a wide selection of powder coated colours.

Features
- Available in a wide selection of high pressure laminate finishes with hardwood or plastic T-Barb edges
- Mild steel locking mechanism includes a spring clip to retain the legs when folded
- Tables can be transported easily from room to room on a custom-made table truck
- Corner posts with integral stacking buffers minimise the possibility of stacking damage and incorporate a swivel clip to enable tables to be linked
- For information on trolleys see page 84

Options
- 150cm half round can be used as a free-standing table or to create a boardroom layout
- 90cm and 120cm half round extension tables are supported by a single cantilever leg and are not free-standing
- Detachable high pressure laminate modesty panels can be fitted as required
- Folding modesty panels are permanently attached to the table and can be folded out or away as required – black texture painted finish (60cm and 75cm width tables only)
- Table available with built-in wheels for ease of use and maneuverability.

TRISMART

Burgess Furniture brings charging options to the table.

Designed by Barry Hughes, TriSmart is a new range of coffee and poseur tables from Burgess Furniture. The new range offers wireless and twin port USB charging for quick and convenient options to recharge devices at the table. The design complements our Configure-8 range allowing our customers to match their conference tables to their breakout area spaces. With a choice of 2 height positions, as well as 5 table top styles and base options, the time is now to redefine your breakout spaces with solid innovations from Burgess Furniture.

Features
- Tops are available in a wide range of HPL finishes with a chamfered edge to match
- Base available in solid paint finishes
- Unique aluminium extruded column
- Leg infills to match or contrast the HPL
- Coffee or poseur height
- PTFE feet to protect floors and provide a smooth glide action

Options
- 5 different top shapes to choose from
- Twin USB charging socket
- Hidden wireless charging

NESTR

Nestr is a range of presentation tables ideal for use with buffets, displays and more. 3 height options seamlessly nest together to reduce storage footprint, and with rectangle and square shapes, you get flexibility on layout design.

The steel frame can be powder coated with our wide range of solid finishes so you can match your aesthetic. Not only that, but you'll save on laundry thanks to a huge variety of high-pressure laminate table tops, available with matching ABS edging – so no need for a table cloth.

Mix multiple heights, finishes and shapes to create a striking display that's perfect for your space.

Features
- 3 different heights for nesting together (set of 3)
- 2mm ABS edge to match

Options
- Any high-pressure laminate table top
- Any solid paint finish

CONFIGURE-8 FLIP-TOP TABLE

The Evoline Push power module is only available on CONFIGURE 8 FLIP-TOP TABLE, see page 68.

AXIAL COMFORT

Axial Comfort power module is a built-in unit that pivots upwards to reveal the power, voice and data sockets at a touch of a button thanks to its spring loaded mechanism. Daisy chaining allows a maximum of 6 sockets to reduce the number of power supplies required.

This product is only for Meet-U® meeting tables, see page 70.

PYRAMID PORTABLE POWER MODULE

The Pyramid Portable Power Module is available in either black or white with wireless charging, USB A + C fast-charging and UK, Shuko (D) or FR-BE power sockets. Hardwired with 2m GST 18 cable and tested to comply with BS5733, this power module is ideal for any venue that needs the flexibility to offer power on tables when requested.

MEET-U TABLE

This power module is only available on MEET-U table, see page 70.

HIDDEN WIRELESS CHARGER

The Burgess Hidden Wireless Charger offers an integrated wireless charging solution to create wireless charging hotspots for devices using Qi.

With the fast-growing demand for power and charging everywhere, the Burgess wireless surface charger is developed to create wireless charging hotspots for use around the globe in offices, hotels, restaurants, and bedrooms. Some examples of applications include coffee tables and bedside tables.

Our Hidden Wireless Charger is available on SmartRocks® and TriSmart ranges, please refer to pages 48 & 81.

PORTHOLE IV MODULE

Available with a choice of black, white and grey plastic fascia with matching trim, the Porthole is ideal for space-saving installations. Features individual fuse and independently certified to BS 5733 UK sockets or a range of international sockets. Fully integrated 4A USB power supply. Power cables come with a standard 1m mains lead.

The Porthole IV Module is available on SmartRocks® and TriSmart ranges, please refer to pages 48 & 81.

POP POWER / USB PORT

Pop is available in black with USB A + C module and UK, Shuko (D) or FR-BE power sockets. Fits flush to the table top and supplied with cable spine, 2 mtr RCD power supply lead and fitted to the table.

ACCESSORIES

OPEN CONCEPT: LINE COLLECTION

Make your hotel room feel more like home.

Substance meets simplicity with the Open Concept: Line collection which features an open wardrobe, bedside table, coffee table and a desk. Combine a selection of shelving options with your choice of durable steel frame to add a sleek, modern element to each room. Strategically place your furniture pieces to create functional storage and work areas in contemporary hotel rooms.

Features
- Wardrobe - clothes rail & several shelves for storage
- Reduced surfaces for less cleaning and easy access
- Durable steel framework

Options
- Choice of 4 decor boards (MFC) with ABS edge to match
- Any Burgess Solid or Architectural frame finish
- Wardrobe supplied either assembled or in kit form
- Custom sizes on request

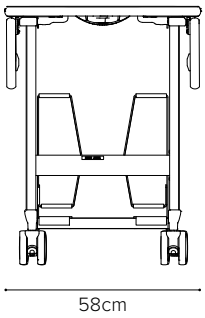
ROOM SERVICE TROLLEY

Practical. Flexible. Functional... a Burgess must-have. The Burgess Room Service Trolley offers hotel staff & guests ultimate flexibility with 3 different top options, ease of use and a modern sharp look. It is an F&B essential for the best in-room dining experience.

Features
- Walnut high pressure laminate
- Grey polyurea spray edge
- Anodised aluminium frame
- Tri-fold flaps & retractable flap stay
- Rotary latch flip-top mechanism
- Storage in echelon minimises storage space
- Minimal moving parts for silent operation
- Smooth running quiet castors
- Pull handles
- Folding zinc plated grilles and recessed magnetic grille catches
- Accommodates 2 x food warmer boxes

Options
- Grey & walnut finishes
- 3 top shapes



RST1
Round

STAND SMART

Designed by Barry Hughes, Stand Smart sets the new high standard for lecterns. Complementing our Configure-8 and TriSmart ranges, upright infill panels of HPL are set into an aluminium frame that can be customised in a variety of finishes.

Ideal for lecture halls and conferences, users can present without worry thanks to an inbuilt paper shelf, USB flexible LED light and the option of integrated power sockets.

Stand Smart's contemporary design will become a focal point for presentations and with cable management, adjustable feet and the option of added logos, it's all the power without the hassle.

Features
- Anodized Aluminium Extrusion or solid powder coat paint finish
- High Pressure Laminate (choose from Classic or Design range)
- USB/USB-C power connectivity
- USB LED flexible swan neck light
- Shelf
- Cable Management
- Adjustable feet for levelling

Options
- Power module with 2 power sockets and 2 USB/ USBC fast charge ports
- HDMI
- Fitted with castors adds 5.5cm to overall height
- Add your logo on an acrylic panel with LED lighting

WALL EYELET

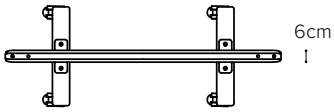
SPLITSCREEN

This lightweight screen on castors is the successor to the Bi-Fold Screen. Designed to partition rooms or conceal areas you wish to obscure from view, it's the ideal solution to transform spaces with ease. The dual panels fabric can be customised to match your space or contrast upholstery for seamless integration.

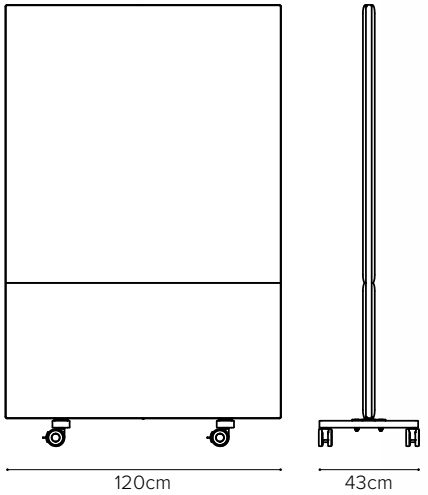
The robust steel frame is available in the Burgess range of solid and premium paint finishes. Foam padding beneath the outer fabric creates a soft touch and helps to reduce noise. Individual panels can be attached with an on-board connector for safety and ease of transport. The connector can hold screens together when nested for safe and convenient storage.

Features
- Contemporary design for more modern interiors
- Robust but lightweight steel frame
- Split panels allow freedom with upholstery choices
- Nesting for compact storage
- Linking connector for both in-use and in storage
- Noise reducing foam padding under fabric
- Timber foot
- Locking castors

Options
- A range of Burgess solid paint finish available for the frame
- Timber foot available in natural, walnut and charcoal stained
- No limitations from the Burgess fabric collection for upholstery



SPLITSCREEN
Depth 43cm



360 DIVIDE

Designed by David Hill for casual seating spaces to block off areas and add an element of privacy, 360 Divide brings playful design and practicality together. With 4 shapes to choose from, as the name suggests, this multi-use screen spins a full 360 degrees on its elliptical steel base and central axis.

The structural wooden skeleton is cladded with foam to aid in noise reduction giving a soft touch to the screen, whilst the option of dual fabrics come together in a frameless design.

With a wide choice of fabrics and base finishes, you can customise your 360 Divide to suit your space.

Available in plain fabrics only, excludes leather and vinyl.

Features
- Panel spins 360 degrees on a central axis
- PTFE glides for ease of movement
- Frameless design
- Elliptical steel base available in all solid paint finishes
- Dual fabric

Options
- Wide choice of fabrics (plain fabrics only)
- 4 shapes/orientations to choose from

CENTREFOLD PLATFORM

The Centrefold Platform is a portable staging system which includes many features for easy operation. The stage is lightweight but extremely strong and durable.

Features
- Two sizes: 244x122cm or 244x183cm
- Dual height: 40-60cm or 60-80cm
- Single height: 40cm or 60cm
- Please specify your height requirements when ordering

Options
- Fascia panels – 122cm or 183cm long and can be 40cm, 60cm or 80cm high
- Guardrails – fits 122cm and 183cm rim
- Steps – H: 40cm, 60cm or 80cm and W: 91cm for all / Tread depth: 25cm
- Handrails – H: 40cm, 60cm or 80cm. Ramps are also available on request
- Linking – available on request
- Skirting – available on request
- Carpet top – available on request

CFP 2412
Unfolded: 244cm (L) x 122cm (W)
Folded: 122cm (L) x 59cm (W)

Dual height: 40-60cm or 60-80cm
Single height: 40cm or 60cm

CFP 2418
Unfolded: 244cm (L) x 183cm (W)
Folded: 183cm (L) x 59cm (W)

Dual height: 40-60cm or 60-80cm
Single height: 40cm or 60cm

GLOSSARY

ABS edge: A thermoplastic table edge available in a vast selection of matching and contrasting colours & designs most suitable for static tables which are not moved around often.

Allday: We are proud to have achieved the FIRA Ergonomic Excellence Award in 2001 with the Siena–Allday Range. The range passed the extensive ergonomic, structural & safety requirements and was the first time a banquet / conference chair gained this award. The findings of this research has enabled Burgess to apply the same ergonomics to all our ranges that carry the "Allday" mark.

Aluminium edging: These edges are fitted to our Slimfold table range, riveted in place to our square and rectangular tables, or crimped in place on our round / contoured tables. In both cases they provide a robust edge which will withstand the rigours of the busy banquet environments and protect the table top against damage.

Aluminium extrusion: All the extrusions used on Burgess products are unique to us, commissioned and produced directly from the mill to our own specification.

Anodised: Anodising is an electrochemical process that converts the metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Aluminium is ideally suited to anodising.

Back décor: As featured on the Simbia range this is a CNC lasercut back splat which creates an interesting decorative feature. For large projects we can design bespoke back décors to incorporate a customer logo.

Bridge top: A table top supplied without legs which connects/spans with adjacent tables to provide an additional surface. Generally bridge tops can reduce the number of table legs and save storage space.

Brushed aluminium finish: Available on aluminium frames (some exclusions apply).

Bull nose edge: Rounded edge applied to the hardwood lip on an HPL table top.

Cantilever: A chair whose framework are not supported by the typical arrangement of 4 legs, but instead is held erect and aloft by a single leg or legs that are attached to one end of a chair's seat and bent in an L shape.

Casting: Casting of metal alloys enable complex details to be created to our own design and depending on the specific material the castings can be powder coated, bright polished or plated.

Chrome plating: The chrome plating process is a method of applying a thin layer of chromium onto a substrate (metal or alloy) through an electroplating procedure. Enhances properties for durability and ease of cleaning.

CMHR: Combustion modified high resilience foam is used when the strict fire code standards are required, such as in hotels lobbies, hospitals, schools, mass transit (airplanes, buses). The foam is self skinning and has a high density which helps it last a long time.

Cut foam: All of our cut foams are manufactured to the highest possible standards, conform to ISO 9001 specifications and adhere to strict UK safety regulations.

Dimensions: All dimensions are in cm unless otherwise stated.

Dished back: Chairs with a dished back offer improved levels of comfort, allowing the contours of the back to increase levels of back support.

Echelon: A method of storing Flip-Top tables and Room Service Trolleys by nesting in staggered rows.

Ergonomics: This is the process of designing or arranging workplaces, products and systems so that they fit the people who use them.

FIRA: FIRA International provides a wide range of independent expert services that are not only dedicated to the global furniture supply chain, but also to furniture consumers, and continues safeguarding the industry.

Fire retardancy: Flame retardants are compounds, which when added to materials during or after manufacture, inhibit or suppress the combustion process or flame spread. Their primary function is to suppress the spread of fires or delay the time of flashover so that people can escape.

Flip-Top: A table with a fixed underframe and a flip-top, normally on castors so the table can be wheeled around. Flip-Top tables can be stored in echelon.

Flock coating: Flock coating is the application of nylon fibres to the surface of our renowned banquet tables. Applied by an automated electrostatic process, this provides an attractive seamless fabric-like coating which supports table cloths and dressings, holding them in place, whilst reducing noise levels during the dining experience.

Frame finish: Powder coating, oven cured at temperatures from 180º – 230ºC.

Frame stacking: Chairs have features built into the design to stack frame on frame, protecting the upholstery from getting crushed.

Hardwood edging: All our hardwood edges are constructed lip-first of 1st grade beechwood, stained and polished as required. The lipping is captured between the faces of the laminates and bonded to the edge of the board ensuring a very durable edge which cannot get detached in normal use.

Hardwood leading edge: A unique profile applied to the hardwood lip creating a decorative edge.

High tensile steel: Steel tube used where increased strength to weight ratio is required, used on all our cantilever chairs, to ensure chairs meet the static downwards load test.

HPL: Decorative high-pressure laminate with robust resin surface. Areas of application: Surface material for high-quality table tops.

Industrial finish: A clear semi-matt powder coated finish applied to steel frames. The nature of this finish is that it reveals the natural elements of the raw frame including weld seams, the individuality of the welding & polishing that goes into the manufacture of the frame. An intrinsic feature of this finish is that there is a variation from one chair to the next.

Lumbar: Lumbar support provides lower back support and improves posture.

Moulded foam: Parts manufactured using integral skin foam systems are by design tough, durable and resilient. All moulded foams used in Burgess chairs are specifically designed for comfort, longevity & durability.

Polyurea spray edge: A highly durable polyurea textured edge sprayed directly to the MDF table edge. Water resistant and very tough.

Seat stacking / nesting: Each chair stacks directly on the seat of the chair below, not recommended with velvet and soft pile fabrics as it can crush the pile.

Solid finish: Available on all aluminium and steel frames.

Standards:

- **BS EN 16139:2013** Furniture – Strength, durability and safety – Requirements for non-domestic seating
- **BS 7176:2007+A1:2011** Specification for resistance to ignition of upholstered furniture for non-domestic seating by testing composites
- **BS EN 15372:2016** Furniture – Strength, durability and safety – Requirements for non-domestic tables.
- **BS 6396:2008+A1:2015** Electrical systems in office furniture and educational furniture – specification.

T-Bar leg: T-bar table legs have the benefit of increasing leg room enabling users to sit more comfortably along the length of a table.

T-Barb edge: Extruded PVC edging provides a neat finish and protects the edges of table tops, particularly suitable on folding round tables that may be rolled into position before being erected.

UV resistant: A property of materials that allows them to withstand extensive exposure to UV light without being damaged or degraded.

Vinyl/Faux leather: An artificial or synthetic leather.

Waterfall seat: The waterfall seat features a rounded front edge to the seat cushion, this relieves pressure on the back of the thighs and offers greater support and comfort.

Webbed seat: All our chairs that feature webbed seats are constructed with durable elasticated webbing which increases the comfort by providing additional suspension in the seat cushion.

Welded corner: The welded corner detail on our Salon, Siena & Como ranges is only available in solid powder coat finishes due to the intensive welding required in the manufacture of this feature.
